

ZHANG SAN

Backend Engineer | 5 years experience

Email: zhangsan@example.com | Phone: 138-0000-0000

EDUCATION

Peking University | Computer Science, Bachelor | 2015-2019

SKILLS

- Proficient in Python, 3+ years backend development
- Familiar with Django, FastAPI frameworks
- Familiar with PostgreSQL, Redis databases
- Familiar with Docker, Linux operations
- Familiar with REST API design
- Understanding of Kubernetes, CI/CD
- Understanding of message queues (RabbitMQ, Kafka)

EXPERIENCE

Tech Company | Backend Engineer | 2019-present

- Designed and developed core business systems
- Built high-performance APIs with Python + FastAPI
- Designed PostgreSQL database solutions
- Containerized deployment with Docker, CI/CD automation
- Optimized system performance, QPS from 500 to 2000

PROJECTS

1. E-commerce backend

- Stack: Python, FastAPI, PostgreSQL, Redis, Docker
- Developed order system and payment system core
- Implemented distributed caching, reduced DB load by 60%

2. Data analysis platform

- Stack: Python, Pandas, NumPy, PostgreSQL
- Built data cleaning and ETL pipelines
- Created data visualization APIs
